

Rodrigo Sobral

Location: Geneva, Switzerland | Role: DevOps Engineer | Experience: 4.0+ years | Education: M.Sc. Cybersecurity

EXPERIENCE

Jan 2024 – Present · DevOps Engineer — CERN, Geneva, Switzerland

Initially allocated to a partnership's project between the IT and ATS departments, created with the main goal of developing a new and internal version of SWAN, named ATS SWAN. After concluding and announcing it in several presentations (ITCSC), I started working on the maintenance and improvement of the general SWAN, and on the development of new features for it.

Python Jupyter Bash Docker Helm Kubernetes ArgoCD Grafana Prometheus Terraform

Sep 2022 – Dec 2023 · Backend Developer — UCNext, Coimbra, Portugal

Hired by the client I was working for as a Analyst Developer, I kept working on the same projects and started some new ones, like: UCCompetitions, UCApply, MyUC, UCAnalytics (internal), UCDigitalSignature (internal), UCID (internal for building access)

Python Bash Redis PostgreSQL REST API Grafana AWS S3 SAP

Jun 2022 – Sep 2023 · Private Tutor — Superprof, Remote

Gave remote private lessons to computer science students in various subjects.

Python JavaScript Networking Algorithms Databases Data Structures Operating Systems

Apr 2022 – Sep 2022 · Analyst Developer — Project Box, Viseu, Portugal

Allocated to multiple consulting projects for a client, as a Backend Developer, working on the development of new features, maintenance of existing ones and refactoring of legacy code, in a microservices architecture.

Python Bash Redis PostgreSQL REST API

Aug 2020 · Summer Intern — Critical Software, Coimbra, Portugal

One month internship where I got my first contact with the industry, working on a prototype, following the software development lifecycle, and using Waterfall and Agile methodologies.

Java Spring Boot Waterfall Agile Scrum Kanban

EDUCATION

2021 – 2023 · M.Sc. Cybersecurity — University of Coimbra

Thesis: Analysis of user behavioral patterns in cybersecurity

Security Auditing · Logging · Monitoring · Incident Response · Risk Assessment and Management · Privacy · Secure Software and Infrastructures · Mobile Communications · Cryptography · Law · etc

2019 – 2025 · CTF Player (offensive security training) — TryHackMe

Pentesting · Kill Chain · MITRE ATT&CK · Exploitation · Malware Analysis · OSINT · etc

2018 – 2021 · B.Sc. Computer Science — University of Coimbra

Compilers · Databases · Algorithms · Graphical Computation · Data Structures · Linear Algebra · Statistics · AI · Distributed Systems · Operating Systems · Network Protocols · etc

CERTIFICATIONS

- CKS: Certified Kubernetes Security Specialist
- CKA: Certified Kubernetes Administrator
- Junior Cybersecurity Analyst Career Path
- Ethical Hacker
- Many others

PROJECTS

TugaCoin

Built a cryptocurrency from scratch, implementing the blockchain system, mining algorithms, wallets, and a web interface for transactions.

NodeJS Bootstrap

Ethereum Todo List

Created a decentralized application (dApp) on the Ethereum blockchain, allowing users to manage their tasks securely and transparently.

NodeJS Bootstrap Metamask Solidity

Small Personal Projects

Bundle of small personal projects, including a infrastructure with multiple microservices, a web scraper, MacOS taskbar plugins, standalone applications, and more.

Python Bash C Electron Docker-Compose

Scheduler Bot

Designed a Discord bot for scheduling messages, whether to an user or to a group, via CLI commands, with a simple interface to manage the scheduled messages.

Python Bash Prisma

Automated Classes

[Python](#) [Bash](#) [Selenium](#)

LANGUAGES

Portuguese — Native | **English** — Fluent (C1) | **Spanish** — Conversational (B2) | **French** — Basic (A2)
